COMPASS Update – February 2018
Big data and UF’s ‘Rise to Five’

Data is as vital to universities as water is to life, and the country’s best educational and research institutions are relying heavily on evolving technologies to remain on top and achieve excellence in teaching, research and service. While change is difficult for those adapting to new systems and processes, the projected benefits to the university are immense and essential to its drive to what President Fuchs has referred to as the “Rise to Five.” UF has been ranked in the top 10 best universities in the country, and to retain that recognition and move upward, needs the predictive and actionable marketing and analytics, and streamlined collaboration and case management these systems offer.

ONE.UF to introduce Faculty/Staff Workspace, new features for faculty, students in March

On March 26, 2018, ONE.UF (one.uf.edu), the University of Florida’s “one-stop shop” for self-service functionality, will go live with a faculty-specific feature – the Faculty/Staff Workspace (formerly Staff Workspace).

COMPASS in Progress

Two major releases of functionality though COMPASS go live this March, along with some
significant enhancements to ONE.UF to be made available to faculty, staff and students. We also recently updated our training chart to include additional topics, training and impacted staff, and we encourage you to take a look if you have not visited the site recently. Release 4 training opened Feb. 5th for staff who award scholarships, advise undergraduate students, place service indicators on students’ records, and enter graduate student qualifying examination and final examination data. Training for Release 5 is also now open for staff who handle student registration. Other COMPASS highlights include:
