COMPASS (Campus-wide Modernization Program to Advance Student Services) Release 3 will facilitate Institutional Student Information Record processing (Student Financial Affairs area), Student Program Plan (Student Records), Residency Processing (Admissions) and SHCC Immunizations (Campus Community, Student Health). Training will be needed for staff who manage student majors, minors and certificates; graduate coordinators and staff; Student Health Care Center staff managing immunizations and health tests; and those who need to view student records.

HOW DOES THIS AFFECT ME?

STAFF:
Training for Release 3 will be needed for staff who manage student majors, minors and certificates; graduate coordinators and staff; Student Health Care Center staff managing immunizations and health tests; and those who need to view student records.

STUDENTS & FACULTY:
Release 3 will bring Students additional self-service functionality via ONE.UF with the addition of “To-Dos” and “Academic Programs” cards, as well as a “Financial Information Release Form” accessible via the Main Menu.

“With Release 3, campus will see the Student Program Plan (formerly called the Career/Program/Plan Stack) in the myUFL Student Information System (Campus Solutions) as the official indicator of students’ academic program(s), including the history of majors, minors, tracks and certificates pursued.”

-Diana Hull, COMPASS Student Records Team Lead

“Financial aid will start to process Institutional Student Information Records (ISIRs) in Release 3. ISIR information is used by the Office for Student Financial Affairs to administer financial aid to students, as well as to meet federal, state and institutional reporting requirements. Federal Verification, the process to validate the information provided on the FAFSA, will also begin in this release. Students needing to submit information or complete a task for Verification will start seeing these items in their To-Dos list in ONE.UF.”

-Mike Dugger, COMPASS Financial Aid Team Lead

“Release 3 will begin utilizing the new Student Information System to capture students’ required Immunizations and Health tests, for UF Health Compliance. This functionality will provide the student detailed information regarding their outstanding immunizations via ONE.UF.”

-Karen Pridgen, COMPASS Campus Community Team Lead

TRAINING & FURTHER INFORMATION:
UF community members needing training on new functionality implemented by Release 3 will be notified of the nature / specific dates of required training by the department or core office. For more COMPASS training resources, visit or email:

Your support is critical to our success!

COMPASS is a partnership among Enrollment Management, UFIT, colleges and business units. The active participation of campus partners is vital to the program’s design, development, implementation, and integration. The COMPASS team is engaging with campus and will continue to do so over the course of the program. You can serve as a champion for COMPASS by sharing your group’s needs and expertise, thinking across organizational lines, advocating for sustainable solutions, and disseminating information broadly across your areas.
